Address: \_\_\_\_\_

\_\_\_\_\_

Telephone Number: \_\_\_\_\_

Signature of Owner: \_\_\_\_\_

Statistics will be published by the BHC's, if you object to your dog being identified please tick here

## PUTNAM (1968) SCORING SYSTEM

(Dogs must be at least 12 months of age and micro-chipped at the time of testing.)

**Excessive force should not be used when manipulating the patella.**

Grade 0	Normal
Grade 1	The patella luxates manually but spontaneously returns to the trochlea when released.
Grade 2	The patella luxates spontaneously or on manipulation and remains luxated at a certain angle of the stifle joint. It is either spontaneously reduced on active flexion or extension or can be manually reduced by the examiner.
Grade 3	The patella remains luxated most of the time but can be manually reduced. However, relaxation occurs spontaneously.
Grade 4	The patella is permanently luxated and cannot be manually repositioned.

Note: Grade 1 and 2 are considered as intermittent PL.  
Grade 3 and 4 are considered as permanent PL.

Please scan/photograph your form and email to: **[gemma@illori.co.uk](mailto:gemma@illori.co.uk)**

If you require a postal address to forward your form please either contact via the above email, or telephone **07919 090 848**.

**Details will be kept strictly confidential unless permission is given to publish.**
